Marana High School - Marana Unified School District (School Year 2013 – 2014)

Marana High School was awarded the S3 grant and selected the following goals and objectives as part of their action plan:

Goal 1 – Improve conditions for learning in eligible schools by utilizing valid and reliable data

Objective 1 – Intervention schools will experience a decrease in the percentage of students who report personal harassment or bullying on school property.

Objective 4 – Intervention schools will experience a decrease in the percentage of students that are offered, sold or given an illegal substance on campus.

During the 2013/14 school year, this high school had a climate index of 82. To improve the climate of the school, the following universal and targeted interventions were selected:

BreakAway

The BreakAway Program focuses its efforts on intentionally creating conditions that promote the academic success of students in the school community. BreakAway provides a framework that emphasizes youth involvement by actively engaging students as advocates for positive change on campus.

Community Development Model (CDM)

CDM is a data driven process to identify and address the availability and type of drugs on campus by working in partnership with the larger community (i.e. small businesses, parents, law enforcement news media etc.) to develop, implement and evaluate an action plan to accurately identify and solve problems that lead to youth risk taking behavior.

Positive Behavior and Interventions Supports (PBIS)

PBIS is a broad range of systematic and individualized data driven strategies for achieving important social and learning outcomes while preventing problem behavior with all students. PBIS applies a three-tiered system of support, and a problem-solving process to enhance the capacity of schools to effectively educate all students.

Student Assistance Programs (SAPs)

SAPs are comprehensive school-based programs designed to identify issues which prevent students from leaning and being successful in school. SAPs provide education, prevention, early identification, intervention referral, and support groups for students.
